# Motorola minitor v manual pdf free full free

All you really need is some wire and you can do it. What is the engineering password? If you have trouble or get stuck feel free to PM me, I usually get back to messages at various times of the day, I just haven't had the time to sit down and do a full write up on this, or if I have it is spent doing a million other things or maybe trying to get a glimpse of some sort of personal life. I will try the software file program edit. I have a programmer but just for everyone else? Just hold the pins in and read the codeplug with the PPS software free from Motorola. Last edited: Jul 20, 2009 question for you guys do you know if you can take a minitor 5 and make a two channel one thru the programming software???? Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. If you pm me I can give you a contact who programs pagers for 5.00 plus shipping (first class which is like 3.50) He may be able to add a second channel not sure though never asked him about it I have always sent him 2 channel pagers. Contents of this manual subject to change without notice. 6. Slide out on the battery pack as shown below. It's pretty easy. This could void the intrinsic safety rating. Page 4 3 INTRODUCTION Congratulations on your purchase of the Motorola MINITOR V Alert Monitor. Please help out a brother. 5. Scan (Two-Frequency Models Only) All alert monitors that are equipped with two frequencies are capable of scanning the two channels for selective call or monitoring purposes, if they pager is only one channel Just keep searching around here, there is an entire thread devoted to this subject. Page 2 If anyone really is interested in having a V programmed and has no way to do it I would be willing to do it for that. Page 17 16 Motorola, Minitor V, Minitor V logo, and VIBRA-Page are trademarks or registered trademarks of Motorola, Inc. All you need is a few things from Radio Shack and presto. Messages are stored according to their length. Expanded stored voice Records up to 8 minutes of voice message for playback. here is the pics from when i did it. UL Approval labels are attached to the Minitor V pager to identify the unit as being UL Approved for specified hazardous atmospheres. Page 6 5 STANDARD FEATURES AND CONTROLS (All Models) ON/OFF Switch/Volume Control The ON/OFF SWITCH/VOLUME CONTROL is a combined single control located on the top of the alert monitor as shown above. Reminder Alert The pager generates a reminder alert approximately every two minutes when an unread message exists. When switching from F2 to F1, the alert monitor listens for any tones and alerts if the proper tones are detected. External Speaker Jack When the alert monitor is used in high-noise environments or when privacy is needed, an optional Motorola approved lapel speaker or earpiece can be connected to the external accessory jack located on the top control panel. Wide and narrow-band programmable channel spacing Available on VHF and UHF models only. Listen for a transmission and adjust the volume control to a comfortable listening level, thanks for the manual. Set the FUNCTION switch to a monitor position. If no transmission is heard, hold down the RESET button and adjust the background noise to a comfortable listening level. When you say scanner cable, I assume you're referring to a radio scanner and not a computer scanner, correct? Unread Message Indicator The red LED turns on if there are any unread messages. It may be necessary to readjust the volume when a voice signal is present. Saved me from spending \$\$\$ on a programmer. & Tm. Off. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. STORED VOICE MODEL FEATURES AND CONTROLS The alert monitors that include the stored voice feature can store up to 8 minutes of voice messages. I just haven't got around to it. Page 14 13 Scan/Monitor Positions In these positions, the message is stored only when a properly encoded message is received. There's a link in the Motorola forum on batlabs forum that you edit a file and its suppose to let you access the engineer mode. was looking for one for ever. I did it just last week and it worked. Turn off the monitor by rotating the ON-OFF SWITCH/VOLUME CONTROL counterclockwise until a click is heard and the mechanical stop is reached. 1st 2013. I will do a write up when I get the time. Thank you! Minitor V I just want to know how to lock out the minitor V. Function mode announcement (Stored Voice option) Announces programmed operating mode. © 2012-2022, manualsdir.com All rights reserved. any update?? Thanks! yep thats it. The post was on batlabs (well really it was batboard). I will have a minitor V Monday, so I won't be able to test to see if it works but however it would be nice to have access to the engineering mode. \$5 + shipping. If preferred, the alert monitor can be programmed for stored voice fixed message lengths of 30, 60 or 120 seconds. • Consult the dealer or an experienced radio/TV technician for help. Page 12 11 If the alert monitor detects a transmission on F2 it stops on F2 then listens for transmissions on F1. © 2005 by Motorola, All Rights Reserved. Messages can be deleted Page 9 8 by either incoming new messages replacing older messages or by turning the receiver off. Reg. This feature is available with the stored voice pagers only and can be disabled through the programming software. Page 2 1 Intrinsically Safe Radio Information Anyone intending to use a radio in a location where hazardous concentrations of flammable materials exist (hazardous atmosphere) is advised to become familiar with the subject of intrinsic safety and with the National Electric Code NFPA 70 (National Fire Protection Association) Article 500 (hazardous [classified] locations), is it still the capital of taiwan? The compact alert monitor is offered in a variety of models including: Page 5 4 BATTERY INSTALLATION NOTE: For optimum performance, the Ni-MH battery pack must be fully charged before operating your alert monitor. interested in detailed instructions..... There is a thread here somewhere can't remember if it was here or batlabs..... I read it, however I didn't feel like I was comfortable enough with altering the pps files to make the engineering mode available in the software. I promise I will try to do a full write up, and maybe even a short bit about how to make the somewhat more sophisticated but still homemade programmer that I built. Just take the plastic cover off the USB Scanner Programming Cable and connect the three contacts on the scanner side (not the 4 on the usb side) as shown to the 3 holes on the bottom of the minitor as shown in the pic. Install your batteries as follows: 1. Press the clip. Turning the control knob a few degrees in a clockwise direction applies power to the receiver, and an audible beep is sounded to indicate that the alert monitor is turned on. To enable the battery gauge, press the reset button. Page 15 14 used to determine remaining battery capacity. I would go with USPS Priority over First Class though. I will try the software file program edit. The jack is fitted with a protective plug. I will get around to it as soon as I have some time. Slide in the battery pack into place, and then slide the battery pack latch to the locked position, if you can't tell, (consider the top row left to right in that pic pins 1-5) that is pin 2, pin 4 and pin 5, 7. The software for the Minitor V is freely available on Motorola's site and the USB Cable at radio shack is much cheaper than the outrageous amount places sell the programming base for. • Do not substitute components. didn't even think to look there, thanks Also, if you did a full install of the Minitor V PPS, the manual can be found in a folder on your PC. C:\-> Program files (86) -> Motorola -> Minitor V PPS -> Manual anyone know where i can get a codeplug for a minitor? Silent scan (Dual-frequency model) Scans both channels silently, alerts on either channel. Other communications monitored on the channel that do not alert your monitor are not stored. Belt Clip Feature An integral part of the clip on the back of your monitor is a security hook. Set the FUNCTION switch to the desired operating mode, i.e., selective call tone, selective call vibrate, monitor, scan, etc. Release the battery lock, and slide the battery pack latch towards the right to unlock the battery pack. If the battery voltage falls below the level required for reliable operation, a low battery pulse tones sounds and the red LED flashes. its pretty easy. Following any subsequent audio message, the Page 8 7 (see Field Installed Options section for reset options). If you look at the pics and the pinout for the V you can figure it all out. In the engineering mode you can do that. If any one could help me out. Radioshack did not have any of those. Set the FUNCTION switch to a tone-alert position. To ensure reliable alerting, it is recommended that this feature only be used when the first tone duration transmitted is one second or more. 12 alert tones per channel Supports 8 two-tone pairs and 4 individual long-tone alerts. Certified for hazardous locations Sealed and sturdy for rugged conditions. Hey, I know that some of you out there have Motorolas Minitor V pager I am looking for a user guide/manual for it I have searched google dozens of pages back and can only find the brochure if anyone out there can scan the pages or give me a link to download the user guide/manual it will be much appreciated. Hey guys, i know the old Minitor 3s had an issue with the knob coverings falling off. 3. Three LED are present and represent approximately one-third of the battery capacity. Page 16 15 Regulatory Agency Compliance This device complies with part 15 of the FCC Rules. NOTE: To prevent entry of dust and moisture, the plug should be inserted whenever the external accessory jack is not being used. This hook is intended to allow easy removal of the alert monitor, while at the same time preventing the unit from being pulled off your belt. FIELD INSTALLED OPTIONS Page 10 Page 11 10 OPERATION Perform the following steps to condition your alert monitor for operation: 1. I have plans on doing a full write up and posting it here on RR but I just haven't had the time to sit down and do it, you can see from the different colors which pin needs to contact where on the programmer. If a transmission is detected on F1, the alert monitor switches to F1 cutting off any transmission on F2. And as for not being comfortable with doing it, you have my word that if you follow the instructions step by step, there won't be any problems. • Increase the separation between the equipment and receiver • Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. In the meantime if anyone has any questions or problems getting it working feel free to PM me and I will try to help you out. What specific cable am I looking for and what is needed to connect it to the Minitor? This label specifies the hazardous Class/Division/Group which will appear as follows: Page 3 2 • Turn a radio off before removing or installing a battery or accessory. As the control is rotated in a clockwise direction, the volume level of any received Page 7 6 message and alert tone is increased. Motorola's advanced technology offers unique features and benefits that set the industry standards for performance, reliability, and styling. 2. It should be noted that the detection of tones is very dependent on the duration of the tone sent over the air. However, it should be noted that if the alert monitor is listening to traffic on F2 and an alert is transmitted on F1, the alert monitor will not hear that signal until the transmission on F2 is finished. Just let me know if you need help. In these cases, or when the manual reset function is programmed into the pager, press the reset button to return your alert monitor to the standby mode. anyone still have the programming guide they can send me please? Priority scan (Dual-frequency model) Plays all traffic on Channel 2, alerts on Channel 1. How about detailed instructions how to do that? Rotating the control in the opposite (counterclockwise) direction reduces the audio level, and turns the alert monitor off. Voice Memo When the alert monitor is powered on or the function select switch is moved to a new position, a voice prompt will be played to announce the mode that the pager is in. Thereafter, whenever a properly encoded message is received, the red LED flashes and an audio alert is sounded. Eight short beep sounds occur and both LEDs light, indicating that power is applied. U.S. Pat. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: • Reorient or relocate the receiving antenna. Global Enterprise and Mobility Solutions 1313 E. Algonquin Rd., Schaumburg, IL 60196-1081 Printed in U.S.A. 04/05 However, there is no guarantee that interference will not occur in a particular installation. Page 13 12 more, the alert monitor decodes tones on either F1 or F2 provided the alert monitor has listened to the appropriate channel at the correct time. PM me Thanks nevermind, got what I wanted Need one here as well, can you hook up a tired old Firefighter? If you need a cheap programmer pickup a Radio Shack USB Scanner Cable. Some of these reset functions will place the pager in the monitor more. I've looked online and cant seem to find anywhere that would just sell the covering for the knob. Well, I've had my 5 for almost 3 years, and last month the covering for the channel selector knob (with the button for the stored voice) fell off and i cant seem to find it. Thanks anyway, back on topic. All I can suggest is this person for parts eBay Store - VFD solutions priced right: Minitor II Parts, Minitor IV Parts, Minitor V Parts If you need a cheap programmer pickup a Radio Shack USB Scanner Cable. speaking of the 5 Hey guys, i know the old Minitor 3s had an issue with the knob coverings falling off. Same goes for the III and IV but you have to find the software for those. Due to the FCC Narrowbanding mandate in the United States, product specifications and brochures for Motorola Solutions two-way radio products may indicate 25 kHz/12.5 kHz analog/digital operation which may not be the standard mode of operation at the time of shipment after Jan. Rotate the ON-OFF SWITCH/VOLUME CONTROL clockwise to turn on the alert monitor. This will illuminate the LED in the battery gauge. Audible/Visual Alert Indicators When your alert monitor is initially turned on, both the red and amber LEDs on the control panel light and an alert tone is sounded until the decoder circuit power-up is complete. • Do not disassemble a UL Approved Product unit in any way that exposes the internal electrical circuits of the unit. I'm thinking I would have to take it to a radio service/repair shop to have it sent out for repair...i surely hope not, any suggestions? 4. Where can I can those copper connectors shown in picture 3? Scan back time is programmable and can be set to 0.5, 1, or 2-second increments. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However it requires modification to the PPS software files to unlock or make the engineering mode available, this is done with a file editor. Programmable Alerts Supports 10 different musical alerts. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
